

SonicWALL, Incorporated

CORPORATE

Relentlessly Engineering the Cost Out of High-performance Secure Networking

Breakthroughs in real-time applications, remote access and mobility have extended the value of business networks, but have also created new conduits for evolving threats. And while criminals spend billions globally on financially motivated attacks, you must defend your organization within ever-tighter budget restraints.

In the past, organizations had to settle for esoteric security solutions targeting single-point threats like viruses, spam and intrusions as they arose, often adding complexity and expense without corresponding value. Today, security technology has evolved, and organizations demand simpler, well-engineered and cost-effective solutions.

SonicWALL® streamlines the complexity out of security, allowing all organizations to leverage the Internet and their networks to enhance productivity, while maintaining the confidentiality, integrity and availability of their information assets. SonicWALL helps you break free from premium-priced, complex legacy systems with easy, affordable solutions that are robust enough to support the needs of any organization. By relentlessly innovating to drive the costs and complexity out of building and running high-performance secure infrastructure, SonicWALL offers organizations exceptional value in:

- **Affordable acquisition** by standardizing to commercially-available hardware, maximizing supply chain efficiencies, and leveraging SonicWALL's leading-edge software development across the entire product line to drive down costs of high-performance network security for organizations of all sizes.
- **Ease-of-deployment** by delivering elegant, simplified solutions that are fast and easy to set up, even in the most demanding network infrastructures
- **Streamlined management and operations** by providing globally-managed, centrally-administered products and dynamic security services that deliver real-time threat and data protection

SonicWALL backs this approach with a recognized commitment to continuous innovation and nearly twenty-years of dedication to the long-term support and dynamic growth of its technology. As your organization grows, and as security threats continue to evolve, you can count on SonicWALL will grow and evolve with you. SonicWALL is committed to providing organizations of all size with solutions of greater value than the competition, at a significantly lower total cost of ownership, through purpose-built solutions designed to address the unique requirements of each customer.

Uncompromising Performance and Security

SonicWALL engineers dynamically intelligent services, software and hardware that seamlessly integrate into a comprehensive offering of high-performance security solutions for network security, secure remote access, Web and e-mail security, anti-spam and backup and recovery. Our market-leading Unified Threat Management technology brings world-class anti-virus, anti-spyware and intrusion prevention to wired and wireless networks of all sizes, in one globally-managed solution. SonicWALL's global network of strategic partners, resellers and distributors are some of the best-known names in information technology. SonicWALL's rich portfolio of security solutions provide millions of our customers with the comprehensive protection necessary to safeguard their businesses—not just their networks.

Award-winning Leadership

Established in 1991, SonicWALL is the global leader of security solutions for small, mid-sized and enterprise organizations, earning high recognition from key industry analysts. SonicWALL is positioned in the Visionaries Quadrant of Gartner, Inc.'s 2007 SSL VPN Magic Quadrant.* Awards and competitive reviews include InfoWorld Technology of the Year, CMP Xchange's Tech Innovator for Security, and over 20 best-in-test and 5-star reviews within the past 12 months alone. With over 15,000 channel partners and more than a million deployments worldwide, SonicWALL has won honors in the VAR Business Annual Report Card in the security appliance category for four consecutive years. SonicWALL is rated among the top three brands among U.S. resellers according to CMP's VAR Business.

SONICWALL®

PROTECTION AT THE SPEED OF BUSINESS®

SonicWALL is a Global Organization

- 25 offices in 19 countries
- 700 employees
- 5 regional support offices worldwide
- Conduct business in 38 countries

SonicWALL is an Industry Leader

- Millions of business users worldwide
- Visionaries Quadrant, Gartner Magic Quadrant SSL VPN*
- Multiple outstanding product reviews and awards

SonicWALL is a Trusted Partner

- 15,000 Medallion Partners worldwide
- CMP Channel 5 Star Program and ARC Award winner
- Comprehensive partner support and product training
- Strategic partner with leading technology innovators such as ProCurve Networking by HP

Organizations That Have Deployed SonicWALL Solutions Include:

- Burton Snowboards
- DePaul University
- Holiday Inn
- Luxair
- Potomac Hospital
- The Walking Company
- The Body Shop

SonicWALL is a recognized leader in comprehensive information security solutions. SonicWALL solutions integrate dynamically intelligent services, software and hardware that engineer the risk, cost and complexity out of running a high performance business network. For nearly 20 years SonicWALL solutions and service providers have given millions of business users the competitive edge of deep protection with uncompromised performance. SonicWALL solutions are successfully deployed across small, medium and distributed enterprise environments around the world, including government, healthcare and retail point-of-sale installations.
