The Army Chief Information Officer (CIO) G-6 Cybersecurity Directorate recommended DoDIN APL placement on 14 July 2016 based on the Cybersecurity (CS) testing completed by the United States Army Information Systems Engineering Command Technology Integration Center (TIC)-led CS test teams. This solution achieved Interoperability (IO) certification from the Joint Interoperability Test Command (JITC) on 23 June 2016. This approval is effective upon the date of this memorandum and expires **15 July 2019** unless a critical issue is identified that invalidates either the CS or the IO posture of this product as determined by the JITC or the Chief Information Officers (CIO) for Combatant Commands, Services, and Agencies. Please note that Services and Agencies are required to recertify and reaccredit their systems every three years. Please refer to the DoDIN APL for official posting of this solution at the following site: <https://aplits.disa.mil/apl>.

The CAR is included in the Cybersecurity Assessment Package (CAP) and can be requested from the Approved Products Certification Office (APCO) per paragraph 4 of this document.
