

CHAROEN POKPHAND FOODS GAINS FUTURE-PROOF SECURE MOBILE ACCESS WITH SONICWALL

Thai agricultural manufacturing firm secures remote worker access and ensures business continuity.

Business need

Charoen Pokphand Foods Public Company Limited is an agro-industrial and food conglomerate headquartered in Thailand. Like many other businesses, Charoen Pokphand Foods transitioned a number of its employees to remote work once the COVID-19 pandemic hit – necessitating the adoption of a secure mobile access strategy in order to ensure safe connectivity and business continuity.

Solution

SonicWall Secure Mobile Access (SMA) has an established track record of helping organizations deliver business continuity and scalability with a lower TCO. The solution also reduces management complexity while enabling organizations to provide anytime, anywhere and any device access to any application or internal IT resource.

As an existing SonicWall customer, Charoen Pokphand Foods Public Company Limited was familiar with SonicWall SMA and decided to add this turnkey functionality to their existing SonicWall lineup.

Results

By deploying SonicWall SMA, Charoen Pokphand Foods was able to extend its remote workforce to 2,000 users. The company also took advantage of 90-day spike licensing to scale capacity to 5,000 users across DC and DR high-ability deployments, further ensuring the remote work transition would cause as few disruptions as possible.

Benefits

- Ensures high degree of business continuity and scalability
- Unifies secure “any time, any device, any application” access to all network resources
- Offers lower TCO and reduced access management complexity
- Eases deployment
- Protects against seasonal fluctuations by offering instant scalability via spike licensing
- Features easy- to-use, customizable, single-pane view through SMA’s workplace portal

Solutions at a glance

- Sonicwall Secure Mobile Access

“During a global health crisis, SonicWall Secure Mobile Access has helped our business operate seamlessly by ensuring our staff can work from home efficiently, effectively and securely.”
