

CONTECH BUILDS STRONGER RELATIONSHIPS WITH SIMPLER MANAGEMENT

Contech Engineered Solutions responds faster to customers and improves network visibility using an email security solution and network tools

Business need

Contech Engineered Solutions needed a better way to control spam and viruses. "We've received a lot of spam, which has led to lost productivity because employees spent too much time managing their junk email," says Matt Alvord, Senior Systems Engineer. Another challenge was the prevalence of phishing emails, which often contain links to malware-infected websites that can infect systems.

Solution

Contech deployed a SonicWall Hosted Email Security solution, featuring cloud-based protection from spam, malware, zombie and phishing attacks. "The possibility of using SonicWall excited us."

Results

"Maintaining SonicWall Hosted Email Security has been a dream. It basically runs itself and allows our employees lots of flexibility to determine their own level of spam filtering. With SonicWall Hosted Email Security, only legitimate traffic gets through, which has really improved our network performance. We can be more responsive to customers and provide the high level of service they demand because of SonicWall. It makes our business better."

Benefits

- Blocks spam and malware-infected email
- Allows users to manage their own junk boxes
- Reduces support call time at least 10 hours per month
- Increases business productivity
