

EGG PRODUCER CUTS TCO, ADDS VP

Cal-Maine Foods saves thousands with SonicWall

Business need

Cal-Maine Foods, Inc., is the largest producer and marketer of shell eggs in the U.S. "We needed to both harden our perimeters and establish secure remote access over SSL VPN," says Norman Bennett, Manager of Network Systems.

Solution

The company deployed SonicWall NSA and TZ Series firewalls, Comprehensive Gateway Security Suite, Secure Mobile Access (SMA), SonicPoint wireless access points and Global Management System (GMS). "Consolidating on a uniform SonicWall platform has given us a lower total cost of ownership."

Results

"Hardware costs are less expensive, the learning curve is shorter and the network is easier to manage. SMA alone saves us thousands a month over leasing dedicated circuits between sites," says Bennett. "It's the easiest solution I've worked with. It lets me generate a multitude of reports to demonstrate compliance with SEC regulations."

Benefits

- Secure connectivity across 36 locations in 12 states
- Application intelligence and regulatory reporting
- Lower total cost of ownership
