

HEALTHCARE ORGANIZATION IMPROVES SECURITY

Promise Healthcare speeds access to medical applications with 35 percent faster network performance while achieving HIPAA compliance.

Business need

Promise Healthcare is one of the largest, long-term acute care (LTAC) hospital organizations in the United States, and is continuing to grow. Promise Healthcare needed to improve security and achieve HIPAA compliance. They were in need of a solution that would deliver a deeper level of network protection and security services without compromising network performance.

Solution

Promise Healthcare replaced its outdated firewalls with SonicWall NSA Series next-generation firewalls, along with the Comprehensive Gateway Security Suite and Content Filtering Service. In addition, it implemented SonicWall Global Management System (GMS).

Results

The new firewalls provide robust security services that protect its patients, doctors, nurses and staff and comply with all HIPAA regulations. In addition, the organization has gained visibility into and control over network utilization, and prevented users from accessing dangerous websites. Equally important, the SonicWall solutions deliver all this security without degrading performance.

Benefits

- Delivers 35 percent faster network performance than previous solution
- Improves security and HIPAA compliance
- Enables deeper security and reporting with IPS, SSL decryption and inspection, gateway anti-virus, content filtering and other security services
