

JAPANESE MOVIE MAKER KEEPS STAFF PRODUCTIVE AND PROTECTED

Toei Company Ltd. enables unified threat protection while maintaining its fast network speeds with SonicWall solutions

Business need

Toei Company Ltd. wanted to bring firewall management in-house and needed an easy-to-manage solution that offered staff protection against attacks on the network.

Solution

The company installed a range of SonicWall firewall solutions to meet the needs of each location. These solutions included SonicWall Network Security Appliances (NSA) and TZ series firewalls.

Results

Today, the Toei corporate network is securely protected by SonicWall firewalls. Data speeds across the network are fast while deep packet inspection technology looks inside data packets for possible threats. Even when intrusion prevention, anti-virus and anti-spyware functions are engaged, there is no dropoff in network performance.

Benefits

- Unified threat protection coupled with excellent network performance
- Intuitive user interface ensures management productivity
- Simplified administration enables greater data analysis
- In-house management reduces firewall costs by 35 percent
- Helps identify and mitigate zero-day attacks

Solutions at a glance

- [Network Security](#)

“By bringing firewall management in-house and deploying a SonicWall firewall solution, we have reduced costs around network protection by 35 percent.”
