

Layer 4 Solutions

Introduction

This case study of Layer 4 Solutions is based on an August 2019 survey of SonicWall NSA firewalls customers by TechValidate, a 3rd-party research service.

“With DPI-SSL, we are protected from SSL employee email-based viruses, which was not the case before the NSa were installed,” says Mark Bleiman, CEO, Layer 4 Solutions Inc. I have confidence in the technical support I will receive when I purchase these products. I have more than 200 registered to me alone.”

Challenges

The organization had tried Cisco Meraki before selecting their SonicWall NSA solution. They deployed SonicWall NSA firewalls because they were challenged with enforcing a uniform advanced security platform across distributed sites.

Use Case

Deep Packet Inspection of Encrypted Traffic (DPI-SSL) was a key feature in selecting their NSA solution. “Besides the DPI-SSL, we use our NSA firewalls in an HA pair for max redundancy, for improved content filtering and for improved speed,” says Bleiman. “The faster CPU’s mean faster work processes.”

Results

Bleiman is extremely satisfied with their NSA Series firewall and agrees they provide the best security value. “My SonicWall NSA firewall is meeting or exceeding my performance and security expectations.”

The company achieved the following results with SonicWall NSA firewalls:

- Improved the efficiency of a business process
- Reduced IT infrastructure costs
- Improved overall system uptime
- Delivered faster performance
- Improved data protection of critical information
- Met regulatory compliance standards
- Increased number of attacks blocked by 51-75%

Company Profile

Company:
Layer 4 Solutions

Company Size:
Medium Enterprise

Industry:
Infrastructure and Engineering

About SonicWall

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era in a work reality where everyone is remote, mobile and unsecure. SonicWall safeguards organizations mobilizing for their new business normal with seamless protection that stops the most evasive cyberattacks across boundless exposure points and increasingly remote, mobile and cloud-enabled workforces. By knowing the unknown, providing real-time visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide.
