

MFA Medical Group

Introduction

This case study of MFA Medical Group is based on a May 2019 survey of SonicWall Network Security customers by TechValidate, a 3rd-party research service.

“SonicWall helped me create a secure work network,” says Imtiaz Haq, Director at MFA Medical Group. “Our clinics each have a TZ that connects back to the main network’s NSA 4600. My TZ series firewalls are meeting or exceeding my performance and security expectations.”

Challenges

MFA deployed SonicWall TZ firewalls to address the following business challenges:

- Enforcing a uniform advanced security platform across distributed sites
- Lowering total cost of ownership
- Consolidating security and networking features in a single solution
- Optimizing network security performance
- Receiving satisfactory support and customer service

Types of cyber attacks that influenced their decision included:

- Malware
- Ransomware
- Never-before-seen/zero-day cyberattacks
- PDF & Office document threats
- Non-standard port attacks
- IoT attacks

MFA evaluated the following brands of firewalls before selecting their SonicWall TZ firewalls:

- Cisco
- Fortinet

Use Case

The key features and functionalities of SonicWall Network Security that were important in selecting their TZ included:

- Capture ATP sandboxing
- Real-time Deep Memory Inspection (RTDMI)
- Integrated VPN

Results

MFA is very satisfied with their TZ Series firewalls.

- They strongly believe that their SonicWall TZs:
 - Beat the competition in security effectiveness
 - Provide the best security value
 - Are easy to deploy and manage
 - Have the networking features they need
- MFA realized the following operational benefits following the deployment of their SonicWall:
 - An improved efficiency of their business process
 - Reduced IT infrastructure costs
 - An improved overall system uptime

Company Profile

Company:
MFA Medical Group

Company Size:
Small Business

Industry:
Health Care

About SonicWall

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era in a work reality where everyone is remote, mobile and unsecure. SonicWall safeguards organizations mobilizing for their new business normal with seamless protection that stops the most evasive cyberattacks across boundless exposure points and increasingly remote, mobile and cloud-enabled workforces. By knowing the unknown, providing real-time visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide.
