

Millard County, Utah

Introduction

This case study of Millard County is based on an August 2019 survey of SonicWall NSA firewalls customers by TechValidate, a 3rd-party research service.

“My SonicWall NSA firewall is meeting or exceeding my performance and security expectations,” says Richard Beckstrand, IT Director, Millard County.

Challenges

The county deployed SonicWall NSA firewalls because they were challenged with consolidating security and networking features in a single solution. They had tried WatchGuard before selecting their SonicWall NSA solution.

Use Case

Single-pane-of-glass management and reporting (Capture Security Center) was important in selecting their SonicWall NSA firewall.

Results

Beckstrand is very satisfied with the NSA Series firewall and agrees that SonicWall NSA beat the competition in security effectiveness.

The county realized the following operational benefits following the deployment of their SonicWall NSA firewall:

- Improved data protection of critical information
- Has seen the number of blocked attacks increase by 51-75%
