

Peloton Consulting Group

Introduction

This case study of Peloton Consulting Group is based on an August 2019 survey of SonicWall NSA firewalls customers by TechValidate, a 3rd-party research service.

“We use SonicWall NSA firewalls in each office,” says Charles Hausmann, Chief Information Officer. Peloton Consulting Group. “They deliver predictable performance across the offices with the built-in security features we need. Having the WiFi tied into the firewall management and config makes the reporting and management much easier for us.”

Challenges

Peloton Consulting Group had tried Fortinet before selecting SonicWall NSA firewalls.

The enterprise deployed SonicWall NSA firewalls because they were challenged with enforcing a uniform advanced security platform across distributed sites.

Use Case

Single-pane-of-glass management and reporting (Capture Security Center) was crucial in selecting the NSA solution.

Results

Hausmann is extremely satisfied with the NSA firewalls and finds they provide the best security value. “My SonicWall NSA firewall is meeting or exceeding my performance and security expectations.”

The enterprise realized the following operational benefits following the deployment of their SonicWall NSA firewall:

- Improved the efficiency of a business process
- Reduced IT infrastructure costs
- Faster performance
- Improved data protection of critical information
- Lowered total cost of ownership
- Has seen the number of blocked attacks increase
