

SADAFCO Increases Security and Visibility with SonicWall

Saudi Arabian dairy and food company's new solution ensures business continuity while minimizing administrative overhead.

Business Need

Started in 1976 with a mission of "nurturing generations with goodness and happiness," Saudia Dairy and Foodstuff Company (SADAFCO) has become a leading food manufacturer, seller and distributor. Today, the company has grown to 28 locations, with some factories running 24 hours a day, seven days a week, 365 days a year.

With no downtime built into this manufacturing schedule, the company was looking for the best cyberdefense possible to ensure uninterrupted business continuity. But SADAFCO was also looking for a solution that offered full visibility and control of the security ecosystem, as well as decreased total cost of ownership not only through a lower purchase price, but also through minimizing administrative overhead.

Solution

SADAFCO had used an older generation of SonicWall products and chose to stay with SonicWall for their upgrade. To suit the company's use case, a solution comprised of NSa and TZ NGFW appliances, NSv virtual appliances and SonicWave Access Points, combined with the additional protection of Email Security and Capture ATP, was deployed to ensure end-to-end security.

Results

SADAFCO reports that its new NGFWs are reliable, and that they provide better security efficacy at a lower TCO. By deploying SonicWall Cloud Management with SonicWall Capture Security Center, the company has simplified operations by reducing silos in their security posture.

Overall, since upgrading to the latest generation of SonicWall solutions, SADAFCO now enjoys deep visibility via a single pane of glass, enhanced network performance, protection from zero-day and advanced threats, and greater ease of use.

Benefits

- Single-pane-of-glass visibility
- Enhanced protection against advanced threats
- Easy to use
- Low TCO
- Platform approach eliminates silos
- Superior reliability means little to no downtime

Solutions at a glance

- NSa Series
- TZ Series
- NSv Series
- Sonicwave Wireless Access Points
- SonicWall Hosted Email Security
- SonicWall ATP/Capture Security Center

"SonicWall NGFWs are reliable, and they provide better security efficacy and better total cost of ownership."

Shrikanth Andali
Head of Information Technology
SADAFCO

"SonicWall's delivery was on time and the migration was smooth. The best advantages of SonicWall solutions are ease of use and single-pane-of-glass management and visibility."

Alarqam S. Alkendi
Service Delivery Manager
SADAFCO
