

SCHOOL DISTRICT SPEEDS PERFORMANCE TENFOLD

Walton County Public Schools enhances mobile learning with SonicWall

Business need

The district sought a faster, more high-performing network security solution. "Palo Alto Networks was not reliable," says Jon Graves, technology services coordinator.

Solution

The district deployed SonicWall SuperMassive Series firewalls in high availability (HA) mode, Comprehensive Gateway Security Suite and Content Filtering Service.

Results

"I came into work and the Palo Alto had crashed the internet," says Graves. After several attempts to fix it, he chose to fire up their SuperMassive evaluation unit. "Five minutes later, I had the internet back up, and that's when I fell in love with SonicWall. SuperMassive easily supports our district's 5,000 devices connecting to it and surfing the internet at the same time. It doesn't even break a sweat. Teachers are happier because they're getting their requests taken care of faster."

Benefits

- Increased internet speeds tenfold
- Achieved greater reliability
- Reduced firewall change time from 15 minutes to 30 seconds
