

Waycool Foods And Products

Introduction

This case study of a SonicWall Network Security Manager (NSM) deployment at Waycool Foods And Products Pvt Ltd is based on a survey by TechValidate, an independent third-party research service. Founded in 2015, WayCool is one of India's fastest growing agri-tech companies. The medium-enterprise food development and distribution services business maintains end-to-end control over the food value chain. It has operations across product sourcing, food processing, branding and marketing, last mile distribution, and farm inputs.

“With NSM, our firewalls can be centrally managed to provision all of the network security services with a single-pane-of-glass experience.”

— Sreeram Devbattini, Consultant

Challenges

The company sought a solution to help simplify management of firewall security across their distributed branch network.

“We needed to be able to manage virtual SonicWall firewalls for multiple tenants in an SD-Branch environment,” explained Sreeram Devbattini, Consultant at WayCool.

To this end, they needed to be able to remotely onboard firewalls easily from anywhere.

Use Case

To accomplish this, the company deployed SonicWall NSM. NSM allows the company to centrally manage all firewall operations error-free by adhering to auditable workflows.

Single-pane visibility lets them monitor and uncover threats by unifying logs across all firewalls.

Results

Devbattini is very satisfied with the NSM solution. “We were able to roll out our sanctioned security policies using a controlled, auditable process,” he reports.

The solution also helps the company discover risks and security gaps, and both audit and enforce security rules.

“NSM gives us the confidence to know our policies are pushed out at the right time.”

Company Profile

Company:
Waycool Foods and Products

Company Size:
Medium Enterprise

Industry:
Food

About SonicWall NSM

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era and a work reality where everyone is remote, mobile and unsecure. By knowing the unknown, providing real-time visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide.
