

Shipping/Transport Lithium Battery Statement

Applies to all “SonicWall” brand network security products.

Date: January 1, 2023

This statement is provided to **support a shipper’s** requirement to comply with provisions set out in Technical Instruction for the Safe Transport of Dangerous Goods by Air and 2023 (64th Edition) IATA Dangerous Goods Regulations (DGR), Lithium Battery Shipping Regulations (LBSR) Edition 10 and for compliance with any specific freight company requirements.

Per 3.3.2 (g). As of January 1, 2023 the UN38.3 Lithium Battery Test Summary is no longer required for button cell lithium batteries

- SonicWall brand products contains no more than one (1) single button cell Lithium Metal battery (Lithium is less than 1g).
- UN# 3091, Packing Instructions 970 Section II, apply;
 - Requirements are met when shipped in original packing for that product;
- To be shipped as not restricted, including by passenger aircraft.
 - The label / marking is not required where packages contain only button cell batteries installed in equipment.
 - If label / marking per Figure 7.2.A is used, then UN 3091 must be placed accordingly. Phone number of shipper is no longer required but allowed until December 31, 2026.
- If package is damaged it cannot be transported any further. Contents must be inspected and repackaged.
- Telephone number for further information contact local sales representative or call +1-888-557-6642 and request shipping information on specific products.

Shippers may be required to provide form(s) specific to any one freight forwarder or carrier. This document is not intended to be a substitute for any required form.
