```
/**
 * Combodate - 1.1.0
 * Dropdown date and time picker.
 * Converts text input into dropdowns to pick day, month, year, hour, minute and second.
 * Uses momentjs as datetime library http://momentjs.com.
 * For i18n include corresponding file from
https://github.com/timrwood/moment/tree/master/lang
 *
 * Confusion at noon and midnight - see http://en.wikipedia.org/wiki/12-hour\_clock#Confusion\_at\_noon\_and\_midnight
 * In combodate:
 * 12:00 pm --> 12:00 (24-h format, midday)
 * 12:00 am --> 00:00 (24-h format, midnight, start of day)
 *
 * Differs from momentjs parse rules:
 * 00:00 pm, 12:00 pm --> 12:00 (24-h format, day not change)
 * 00:00 am, 12:00 am --> 00:00 (24-h format, day not change)
