

# Capture Client Displacement Promotion

## Promotion

### SonicWall Capture Client Displacement Promotion

Promotion is valid until April 30, 2023. While supplies last.

Replace existing competitive and legacy SonicWall endpoint products with SonicWall Capture Client.

Give your customers using competitive anti-virus solutions or legacy *SonicWall antivirus solutions* up to one (1) year free when they migrate to SonicWall Capture Client. This is an exciting opportunity to land and expand your business not just from the firewall but now through endpoint security as well by offering your customers Capture Client Advanced as either a 2-year (for the price of 18 months) or 3-year term (for the price of 2 years) subscription.

### Qualification criteria for competitive displacement promotion

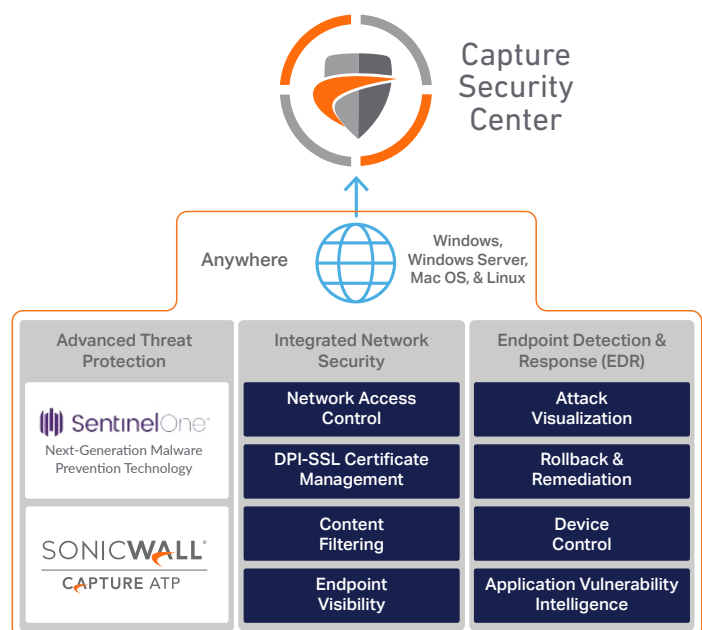

There are minimum qualification criteria for customers to take advantage of these SKUs, which is why they are not available on standard pricelists.

In order to use the SKUs, ALL of the following conditions must be met for the proposed customer environment:

- The customer has an active entitlement to use a competitive endpoint anti-virus/anti-malware product. All competitive endpoint anti-virus/anti-malware products will be considered "valid competitors", except for free antivirus solutions (e.g. Windows Defender) or SentinelOne Endpoint Protection Platform.
- The customer has not already purchased any Capture Client Competitive Displacement SKUs under this program.

To validate legitimate use of the SKU, SonicWall maintains the right to follow up with the partner after purchase.
