# SonicWall Switch Promotion
Instant Savings up to 35%

The SonicWall Switch delivers high-speed network switching and unparalleled performance.

Maximize savings between May 1 and October 31 with this exclusive offer for the SonicWall Switch. This feature-rich, high-speed network switching solution provides Layer 2 switching functionality as well as easy management, security and visibility through your SonicWall firewall or Wireless Network Manager (WNM). Upgrade to the SonicWall Switch today and you can save up to 35%*.

The SonicWall Switch includes essential features such as a unified security posture, high port density, gigabit or 10-gigabit performance capabilities, and Power over Ethernet (PoE) options. New features such as Simple Network Management Protocol (SNMP) monitoring and the ability to backup and restore switch configurations make the SonicWall Switch ideal for small- and medium-sized businesses (SMB) as well as Software-Defined Branch (SD-Branch) deployments.

Key Features:

- SD-Branch ready
- Zero-Touch deployment
- Layer 2 switching
- 8/10/24/48 port models with various PoE options
- Quality of Service (QoS) support
- Segmentation and compliance
- Energy-efficient design
