

SonicWave Access Points: Purchase three - the fourth one free.

Connect with great savings on SonicWave access points. For a limited time, get four SonicWave 621, SonicWave 641 or SonicWave 681 access points for the price of three. This offer applies to APs purchased individually, as well as four-packs and eight-packs. So if you purchase three singles, you get the fourth free. Or if you purchase three single-unit packs, you'll get one free.

SonicWall's 600 Series Wireless Access Points (APs) use 802.11ax — the most advanced technology available — for superior performance in complex, multi-device environments.

Cloud-managed using SonicWall's Wireless Network Manager (WNM)*, these APs offer a number of additional features that provide an enhanced experience, all while delivering the best-in-class security that you expect from SonicWall.

* SonicWave 600 Series access points are currently only manageable through Wireless Network Manager (WNM). Firewall management capability is expected at a future date.
