

SONICWALL NSA FIREWALLS CASE STUDY

Department of Energy, Republic of the Philippines

Introduction

This case study of the Department of Energy, Republic of the Philippines is based on an August 2019 survey of SonicWall NSa firewalls customers by TechValidate, a 3rd-party research service.

"SonicWall secures our organization with assurance and high availability," says Edsel Sangalang, Network Administrator, Department of Energy, Republic of the Philippines.

Challenges

The organization deployed SonicWall NSa firewalls because they were challenged with enforcing a uniform advanced security platform across distributed sites.

Use Case

"Our organization uses SonicWall NSA on our main office for our three ISPs, with HA configuration as our primary firewall and two independently for the remaining ISPs," says Sangalang. "We also use TZ model for our branch offices."

Key features that were important in selecting their SonicWall NSa firewall included:

- Capture ATP multi-engine sandboxing
- Integrated 802.11ac Wi-Fi
- Integrated VPN

Results

Sangalang is very satisfied with their NSa Series firewall and finds they provide the best security value. "My SonicWall NSa firewall is meeting or exceeding my performance and security expectations."

The agency achieved the following results with SonicWall NSa firewalls:

- Improved the efficiency of a business process
- Reduced IT infrastructure costs
- Improved overall system uptime
- Improved data protection of critical information
- Increased number of blocked attacks by 51-75%

Organization Profile

Organization: Department of Energy,

Republic of the Philippines

Organization Size: **Federal**

Industry: Government

About SonicWall

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era in a work reality where everyone is remote, mobile and unsecure. SonicWall safeguards organizations mobilizing for their new business normal with seamless protection that stops the most evasive cyberattacks across boundless exposure points and increasingly remote, mobile and cloud-enabled workforces. By knowing the unknown, providing realtime visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide.
