

## Eijerkamp Enhances Its Cybersecurity Infrastructure With SonicWall

Eijerkamp, a Dutch retail group with stores in Zutphen and Veenendaal, sought to upgrade its security IT infrastructure to enhance security and ensure high performance across two locations.

### Business Need

Founded in 1928 in the Netherlands, Eijerkamp is a retail group that comprises furniture stores situated in Zutphen and Veenendaal, as well as an online shop. With a workforce of nearly 250 employees, Eijerkamp delivers a distinctive shopping experience at its stores and turn their customers into Eijerkamp ambassadors. The company boasts a catalogue of over 350 furniture brands and keeps up with the latest trends in interior design.

As Eijerkamp's previous solutions were out of support, the company's top priority was to enhance security and safeguard its servers against potential cyber threats. For that, they were facing an urgent need to upgrade its IT infrastructure to ensure optimal security and performance across its two locations.

### Solution

To address this, Eijerkamp partnered with BData ICT Solutions, a SonicWall partner in the Netherlands. BData ICT Solutions specializes in the installation, management, and maintenance of networks, servers, peripheral equipment, and workstations. Eijerkamp's trust in BData ICT Solutions led them to choose SonicWall's cost-effective, easy-to-manage, and reliable solutions, which included a SonicWall Network Security appliance (NSa) 4700 High Availability (HA) for their main location in Zutphen and SonicWall Next-Generation Firewall TZ670 HA for their other location in Veenendaal. With SonicWall's technology, Eijerkamp has been able to increase its security effectiveness while keeping the operational cost low and protecting their networks with ease.

### Benefits

- Secure networks and connections
- Increased security effectiveness
- High performance
- Easy deployment
- Cost-effective equipment
- High-quality technical and commercial support

**eijerkamp.**

*"If you have the possibility to change Eijerkamp's firewalls, then you can handle the whole world. Thanks to our partnership with BData and SonicWall, we can be sure that our shops are well-protected against any potential cyber threats, instilling in us a deep sense of security and complete trust in our security measures"*

**Gert Jan Van Dunschoten**

*It Manager at Eijerkamp*

*"Despite being a small company with 10-12 employees, BData has consistently delivered exceptional results for Eijerkamp, fostering a strong trust-based partnership. This foundation made it easy to offer the high-performance solutions SonicWall has in its portfolio."*
