

Goed Wonen Gemert's Path to Robust Security With SonicWall

SonicWall's solutions enabled Goed Wonen Gemert to fortify their security infrastructure, ensuring the safety and well-being of their tenants and communities while simplifying management.

Goed Wonen Gemert, a dynamic housing corporation located in Gemert-Bakel, Netherlands, manages a diverse portfolio of over 2,800 homes. With a dedicated team of 35 employees, they are deeply rooted in their local communities, actively contributing to improving the living and working environments of their valued tenants.

Business Need

Goed Wonen Gemert sought to bolster cybersecurity measures and for that they were guided by their SonicWall Partner, Activato, to implement Capture Client in their solution. The objective was clear: minimize the risk of security breaches while maintaining a smooth and efficient desktop infrastructure.

Solution

Goed Wonen Gemert adopted SonicWall's NSa 2700 High Availability firewall set up a while ago and recently expanded this with Capture Client through the Managed Desktop solution, powered by Microsoft Intune, provided by Activato.

The implementation of SonicWall solutions allowed them to enhance their security posture across their organization, regardless of device or employee location. They achieved comprehensive protection against advanced threats, reduced security management overhead, and eased administration.

Benefits

- Increased security effectiveness
- Streamlined management with easy integration into current SonicWall Firewall
- Minimal device impact and 24/7 automated response

Solutions at a glance
