

## ISVEA Gets Superior Support and Protection with Gen7 TZ Models

Chic Italian-inspired bathroom furniture company notices better tech support and improved security with SonicWall.

### Business Need

Since 1962, ISVEA has been at the forefront of chic bathroom furniture and sanitary ware with its award-winning designs inspired by and born of Italian design philosophies. With multitudes of valuable assets to protect like customer information, designs and the data of its over 1,000 employees, reliable cybersecurity is a must-have for ISVEA. The organization was using a competitor solution for eight years, but its recent performance and price testing and lackluster experience with tech support led the company to look for a cybersecurity provider that could better meet its unique needs.

### Solution

After searching far and wide for the right cybersecurity provider, ISVEA decided on SonicWall. The business selected the SonicWall Gen7 TZ Models as its data defender and used it as well as SonicWall's other security features to create a secure network structure across its many locations. ISVEA identified rules and policies for common users, administrators and guest users.

### Results

After switching to SonicWall, ISVEA now receives lightning-fast responses from both SonicWall and its partner, Erko Bilgisayar, when the need arises. The company has noticed that the SonicWall devices are extremely stable even under heavy loads. After making the switch, the bathroom furniture company has been enjoying increased protection from SonicWall's solutions. Its previous provider had been limiting its usage of both its firewall and firewall settings, but with SonicWall, ISVEA has seen no such limitations.

### Benefits

- Superior tech support
- Faster response times
- Increased stability
- Enhanced protection

### Solutions at a glance

- SonicWall TZ Series

*"The SonicWall devices are extremely stable."*
