

KIMBOLTON SCHOOL TAKES NETWORK SECURITY TO THE NEXT LEVEL

SonicWall provides ideal solution to comply with new Government online safety guidance

Business need

Kimbolton School required a high performance, yet flexible network security solution that would enable learning, whilst safeguarding its boarding students' online experience around the clock.

Solution

The college deployed SonicWall Next Generation Firewall (NGFW) and management reporting, which provided the throughput required to easily manage its increased levels of internet usage and reporting requirements.

Results

"The network is stable and reliable at all times. The SonicWall Firewalls are configured to protect the school around the clock. Students have continuous access to new information and the ability to use applications to further their studies at all times. The school also has complete peace of mind that the internet is a safe place even outside of normal school hours." Andy Walker, Director of ICT, Kimbolton School

Benefits

- Fast, secure and uninterrupted access to the internet and online learning resources
- Ability to extract detailed user activity on the web
- Ability to meet the latest Government online safeguarding requirements
- Scalable solution that will meet current and future needs
- All-in-one solution for deep packet inspection and content filtering

Solutions at a glance

- [SonicWall SuperMassive Series](#)
- [SonicWall Comprehensive Gateway Security Suite](#)

"The SonicWall next generation firewall provides us with a longterm solution that easily deals with the school's bandwidth needs - it is currently running at half the SSL-DPI capacity - and is the ideal solution to enable us to comply with Government guidelines."
