

Eulen America

Introduction

This case study of Eulen America is based on an August 2019 survey of SonicWall NSA firewalls customers by TechValidate, a 3rd-party research service.

“We have been using SonicWall for many years,” says Roberto Bueno, IT Director, Eulen America. “It’s reliable, robust and easy to deploy and manage.”

Challenges

Eulen America is a large enterprise providing a broad spectrum of ground services in airports throughout the United States.

“We have about 30 locations,” says Bueno.

The company deployed SonicWall NSA firewalls because they were challenged with enforcing a uniform advanced security platform across distributed sites.

Use Case

Integrated VPN was important in selecting their SonicWall NSA firewall.

“We use them as firewalls/routers in all the locations, VPNing to the head office and the data center.”

Results

Bueno is extremely satisfied with their NSA Series firewall, and finds it includes the networking features they need. The SonicWall NSA firewall is meeting or exceeding Bueno’s performance and security expectations. The enterprise found they lowered total cost of ownership by selecting the SonicWall NSA solution.
