

# LEADING MUSIC AND DISTRIBUTION COMPANY REVELS IN 12 YEARS OF NETWORK IMMUNITY

T-Series counts on SonicWall next-generation firewalls and the Capture Advanced Threat Protection cloud sandbox for a smooth, secure and uninterrupted network

## Business Need

As a content production and distribution outfit, T-Series collaborates with several partners for delivery of both content and packaging. Entire libraries of concerned parties reside online and the subsequent transfers take place via the same network. That being the case, the company took the plunge and tightened their network envisioning smooth operation in the future.

## Solution

T-Series deployed SonicWall NSA 5600 next-generation firewalls in high availability (HA), along with the SonicWall Capture Advanced Threat Protection (ATP) sandbox and Analyzer service. The company opted for NSA 4600 in High Availability in all other offices in the country.

## Results

“As the way we have invested in SonicWall solutions, we will continue to invest in security solutions to offer our consumer engagement, conversion data and other important aspects of business to attain the desired goals.”

## Benefits

- Enhanced security and performance
- Intuitive user interface that makes the solution easy to use
- Improved stability and visibility

## Solutions at a glance

- SonicWall NSA 5600 Firewall in HA with Capture ATP
- SonicWall NSA 4600 Firewall in HA with Capture ATP

“Security is no more a top-of-mind concern,” remarks Sachin Chauhan, GM (IT), T-Series. “It has been long since we fretted over the security of our network. That’s 12 years of SonicWall for you.”
