Lesedi Nuclear Services

Introduction

This case study of Lesedi Nuclear Services is based on an August 2019 survey of SonicWall NSa firewalls customers by TechValidate, a 3rd-party research service.

✔ Validated

> " "My SonicWall NSa firewalls are re easy to manage, backed by good support and do the job required," says Darren Hammond, ICT Manager, Lesedi Nuclear Services.

Challenges

The organization had tried Fortinet before selecting their SonicWall NSa solution. They deployed SonicWall NSa firewalls because they were challenged with enforcing a uniform advanced security platform across distributed sites.

Use Case

"The NSa firewalls provide the central breakout for multiple sites," says Hammond. Key features that were important in selecting their SonicWall NSa firewall included:

- Capture ATP multi-engine sandboxing
- Single-pane-of-glass management and reporting (Capture Security Center)
- Real-Time Deep Memory Inspection (RTDMI)
- Zero-touch deployment
- An integrated VPN
- SD-WAN implementation

Results

Hammond is very satisfied with their NSa Series firewall and agrees they provide the best security value. "My SonicWall NSa firewall is meeting or exceeding my performance and security expectations."

The organization achieved the following results with SonicWall NSa firewalls:

- Reduced IT infrastructure costs
- Improved overall system uptime
- Improved data protection of critical information
- Lowered total cost of ownership
- Increased number of blocked attacks

Company Profile

Company:
Lesedi Nuclear Services

Company Size:
Medium Enterprise

Industry:
Engineering

About SonicWall

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era in a work reality where everyone is remote, mobile and unsecure. SonicWall safeguards organizations mobilizing for their new business normal with seamless protection that stops the most evasive cyberattacks across boundless exposure points and increasingly remote, mobile and cloud-enabled workforces. By knowing the unknown, providing real-time visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide.
