SONICWALL NSM CASE STUDY

MB Computer Consulting

Introduction

This case study of a SonicWall Network Security Manager (NSM) deployment at MB Computer Consulting is based on a survey by TechValidate, an independent third-party research service. Founded in 1999, Eastern Virginia-based MB Computer Consulting LLC offers small business a cost-effective technology platform, services and support.

> "NSM helps us monitor traffic to our customer. The remote software is easy to use and understand,"
> —Michael Britt, Consultant

Challenges

The computer services company sought to simplify management for single-site protection.

"We manage small businesses and consumers," says Britt.

"These devices were setup for one small business who must have best protection from intrusion."

Use Case

MB Computer Consulting implemented SonicWall Network Security Manager for single-site on-prem firewall deployment and management.

With NSM, Britt can deploy consistent security policies across multiple locations and tenants, using flexible controls from a single user-friendly console.

Results

Britt reports that he is extremely satisfied with the NSM solution.

He finds NSM's ease of use and management capability especially beneficial.

"All of our dealings with SonicWall — from sales to service — have been excellent and timely."
