

# Mount Saint Joseph High School Gains Better Reliability with SonicWall

Mount Saint Joseph High School deployed SonicWall NSa Series next-generation firewalls to meet the growing needs of its staff and students.

## Business Need

Mount Saint Joseph High School is a Catholic high school in Baltimore, Maryland, that has been developing young men spiritually, intellectually, physically and emotionally since 1876. The school realized that its connectivity had grown to a point where it needed to resize its connection as well as the firewalls that manage that traffic. The school needed to add capacity and reliability as well as student monitoring capabilities.

## Solution

Mount Saint Joseph High School decided to deploy two NSa Series next-generation firewalls to meet its growing needs as an educational institution including better reliability and greater capacity. With SonicWall, the school was also able to add the monitoring capabilities that it needed.

## Results

Mount Saint Joseph High School believes that its SonicWall products are superior to the products it has worked with in the past. The school is also pleased with the expertise and knowledge provided by SonicWall's sales and service teams. The sales team at SonicWall worked with the school to identify, install and test monitoring software for its new systems. A consultant with Mount Saint Joseph High School stated, "SonicWall is an easy company to work with given their customer focus and depth of resources."

## Benefits

- Reliability
- Monitoring
- Customer service
- Professionalism

## Solutions at a glance

- SonicWall NSa Series

*"SonicWall is an easy company to work with given their customer focus and depth of resources."*
