

Schell Games and SonicWall: A Partnership for the Ages

Schell Games has trusted SonicWall to provide reliable, comprehensive security solutions for its game development company since its inception in 2002.

Business Need

Schell Games is not just a game developer – it's a pioneer in creating immersive and engaging experiences that educate and entertain millions of players around the world. From the award-winning VR escape game "I Expect You To Die" to the absurdly popular social deduction game "Among Us VR," Schell Games has a proven track record of crafting hit games that appeal to a wide audience. Schell Games knows that its cybersecurity is not a game, which is why it has trusted SonicWall as its partner since its inception. As a leader in the games industry, Schell Games needs to ensure that it has comprehensive security solutions throughout its entire development pipeline to protect its valuable data and other assets.

Solution

As a long-time SonicWall customer, Schell Games is currently using SonicWall's NSa 4650 with Capture Advanced Threat Protection (ATP), On-Prem Analytics and Cloud Edge. This suite of powerful cybersecurity tools is easy to get up and running and has reduced management times and costs. With SonicWall's Cloud Edge, the company was able to simplify its zero-trust VPN solution and protect its valuable assets from cyber threats. The NSa 4650 allowed the game developer to deploy Capture ATP sandboxing as well as the Advanced Gateway Security Suite to secure its internet edge.

Results

As a leading game developer, Schell Games relies on SonicWall's solutions to protect its valuable intellectual property and network infrastructure. The company enjoys having multiple levels of security visible on a single-pane-of-glass. SonicWall's solutions have enabled Schell Games to achieve higher security effectiveness, lower and more stable security costs, and a faster ROI. Schell Games especially appreciates the advanced sandboxing capabilities of SonicWall's Capture ATP service, which detects and blocks known and unknown threats before they can harm the network. Schell Games is very satisfied with the performance, affordability and usability of SonicWall's products, as well as the excellent service it receives from its vendor and SonicWall itself. SonicWall is proud to be a part of Schell Games' success story and is happy that Schell Games trusts us to keep its network and data secure while it creates amazing games for its customers and fans.

Benefits

- Slashed costs
- Quick ROI
- Higher security effectiveness
- Single-pane-of-glass management

Solutions at a glance

- SonicWall NSa Series
- SonicWall Capture ATP
- On-Prem Analytics
- SonicWall Cloud Edge

"Overall, SonicWall products and services have been great for us. Their cost, ease of use and effectiveness makes it an easy choice when it comes to any security solution."
