SONICWALL®

A small team and a smart solution, keeping big business secure.

Shopware AG is a leading e-commerce system utilized by some of Europe's largest brands, retail chains and producers, in both B2C and B2B industries. As an open source solution, Shopware gives users the freedom to develop their growth potential in a fast, flexible and easy manner. Over 100,000 companies have already put their trust in Shopware solutions. In 2020 alone, these companies generated combined sales of 12 billion Euros.

Business Need
Shopware has worked with SonicWall for more than ten years. The company has a relatively small IT department, so it is crucial to maintain the highest levels of protection, and also keep administration as simple as possible. Performance also played a major role in choosing the right security solution to meet their current needs.

Solution
Two NS*a* 6700 firewalls giving Shopware a way to increase security without sacrificing performance. The appliances feature SonicWall's powerful Capture ATP sandbox, including patented Real-Time Deep Memory Inspection™ technology - which scored 100 % of possible points three times in a row in ICSA Labs' October 2021 Advanced Threat Detection certification test - ensuring the network is protected by one of the best threat protection solutions on the market. The SMA 400's integrated SSL VPN solution provides easy and secure remote dial-in.

Results
The combination of two SonicWall NS*a* 6700s and two SonicWall SMA 400s, coupled with SonicWall Capture ATP guarantees a balance of high security and easy handling. Simple migration options resulted in very little downtime during the migration process. Furthermore, the integration of the SMA into a modern identity management system has led to a significant reduction in costs and support effort, without compromising on security.

Benefits
- Outstanding security with less administration and lower costs
- Simple migration leading to very little downtime
- Simple and secure remote dial-in
- Reliable Advanced Threat Protection with Capture ATP

Solutions at a glance
- 2x SonicWall NS*a* 6700
- SonicWall Capture ATP
- 2x SonicWall SMA 400

"SonicWall offers us a reliable, holistic solution. The NSa work well with the SMA. Also important for us are the hardware upgrades; they function faultlessly and above all, are easy to handle."

Patrick Schücker
Manager IT Administration, Shopware
