

SONICWALL CAPTURE CLIENT CASE STUDY

Stratton Seed

Introduction

This case study of Stratton Seed is based on a July 2020 survey of SonicWall customers by TechValidate, a 3rd-party research service.

"We block any devices that don't have Capture Client installed from logging onto the network. Knowing our network is protected from malware and viruses gives me peace of mind." - Craig Chandler, Business Professional, Stratton Seed

Challenges

The medium enterprise business was challenged by having to manage multiple clients for their endpoint security needs.

Chandler had evaluated Symantec and Sophos solutions before selecting SonicWall Capture Client.

Use Case

When evaluating Capture Client, Chandler found it easy to access a trial and get all the information he needed to make his decision.

Chandler did not require any training to get it set up and rolled out. He was happy with Capture Client's documentation and technical support and found them helpful.

Results

By deploying Capture Client, Chandler reports that the company has:

Improved the efficiency of its threat report processes

Company Profile

Company: **Stratton Seed**

Company Size: **Medium Enterprise**

Industry: Agriculture

About SonicWall

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era in a work reality where everyone is remote, mobile and unsecure. SonicWall safeguards organizations mobilizing for their new business normal with seamless protection that stops the most evasive cyberattacks across boundless exposure points and increasingly remote, mobile and cloud-enabled workforces. By knowing the unknown, providing realtime visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide. For more information, visit www.sonicwall.com or follow us on Twitter, LinkedIn, Facebook and Instagram.

- Reduced the time to respond to malware attacks
- Improved end-user productivity
- Improved protection of critical information

Chandler states that Capture Client is better than other endpoint security products in:

- Ease of deployment and roll out
- Endpoint detection and response
- Application vulnerability intelligence
- Management and reporting

"It provides a heartbeat from the client letting the firewall know the status of the client," explained Chandler "If the client is not fully protected, then the firewall blocks any communication with other endpoints on the LAN as well as outside the network (WAN)."
