

HEALTH SERVICE PROTECTS CONFIDENTIAL PATIENT DATA

NHS Yorkshire and Humber Commissioning Support ensures security and achieves 100 percent ROI with SonicWall solutions!

Business need

As the only part of the YHCS with access to confidential patient data, the newly formed Data Management Integration Centre (DMIC) needed a firewall to secure its network across its three sites. It also required secure remote access capabilities.

Solution

DMIC selected SonicWall solutions and is now assured of the required levels of security to prevent breaches, as confirmed by an external security audit. Furthermore, the organisation achieved 100 percent ROI in just a few months.

Benefits

- Delivered required level of security, as confirmed by a security audit, for both onsite and remote access
- Delivered 100 percent ROI in just a few months
- Enabled IT to focus on strategic projects by requiring just one hour per week of ongoing management
- Ensured high volumes of data could be transferred without issue
- Provided fast and straightforward setup and configuration
